Dear Mr. Blossom:

We have passed our most recent extension on the Kittitas dump site. After regular observation, we feel that we must now issue the final closure order. The site was allowed to remain in its non-conforming condition so that some salvage of the existing materials could occur. While some materials have been removed, Mr. Brite is now accepting junk cars and other non-conforming materials at that site. He has been fined one time for this action and in all probability will be again unless he completes his activities and pulls out of the site.

Mr. We are hereby setting the final date for the abatement of the non-conforming condition at the Kittitas dump site. The site must be ~~compacted~~ and covered by April 1, 1974. After that time, only the wire and construction wastes will be placed on that site.

If you have further questions, please feel free to contact me.

Sincerely,

AEB
Andrew E. Bishop, R.S., M.P.H.
